

— CORPORATE BROCHURE

Fund safety, sincere practices and high quality performance have been benchmark for the success of our company.

www.argoprimez.com

ABOUT

Argoprime operates as an international digital investment/mining management platform. Our Company offers access to multiple, automated, algorithm driven financial services, investment solutions, diversified alternative investments, portfolio management, financial planning, and advisory services.

Argoprime began as an early investor in today's most recognizable alternative investment funds, creating and managing several investment funds catering to offshore high net worth investors. Sovereign pioneered the distinctive vision to create an institutional solution to not only navigate, but also facilitate and simplify, the alternative investment journey.

Having a keen understanding of the industry, we realize that one size does not fit all, and advisors

need more customizable options to avoid slow and strategy overlap in client portfolios. The clients too are introduced to multiple investment options to improve their investment results and grow their investments positions to create a desired portfolio figure.

Our proprietary technologies, specifically designed for alternatives/institutional investments/mining over the last few years, is re-tooled as a web-based platform. For the first time, our proprietary analytics, portfolio optimizer, research and due diligence, and reporting capabilities become available to our clients, providing enhanced transparency so advisors can serve their clients professionally and our distinct clients/investors also have a better, valued experience with us. Our technology and clients-data info become cloud-based, providing our clients with enhanced security, scalability, and resilience.

Argoprime Platform is a group company of 190,000+ strong professionals and 5 mega data center's parent Cy-future with experience of over 15+ years

in Data Center Industry serving 2 million Customers. Our crypto mining team comes from different scientific disciplines and constantly monitor latest innovations and implement them in order to benefit our investors.

At Argoprime, we're using world's best ASIC (Application specific integrated circuit) and GPU (Graphics processing unit) machines to generate best returns for investors with high efficiencies.

At Argoprime, we understand that not all of our clients are alike. We do not discriminate between our clients and want to serve all our clients with utmost dedication. We understand that each of our clients face different challenges with their finances.

Our investment plans outperform the traditional bank investment and encourage entrepreneurship by encouraging clients to setup their own affiliate business with us. Fund safety, sincere practices and high-quality performance have been benchmarked for the success of our company.

Having diversified business structure on major markets have allowed us to promptly pay high returns to our investors. Providing non-risk plans to our investors by estimating and visualizing the way the market will tend to behave by considering various factors such as environmental, laws, liquidity, geopolitical, etc. has been the primary motto of our company.

The Company has had very good results in both trading, mining and start-up financing. However, what we are having now is a tiny part of what we could have if we had enough funds to use every earning opportunity in our sphere. For the purpose of increasing our current assets, we have decided to attract funds from private and corporate investors through our website platform and make profit from many more earning opportunities which we currently have to decline or ignore due to limited assets.

Our service makes Investments accessible to everyone. We believe in the future of cryptocurrencies and we love to be part of this growing community. Our dual Trading system is suitable for those who are new to the world of cryptocurrencies and looking for an easy way to invest money.

Our crypto mining team came from different scientific disciplines and constantly monitor latest innovations and implement them in order to benefit

investors. We have large-scale industrial data centers with state-of-the-art technology to host the diverse and complex mining environments.

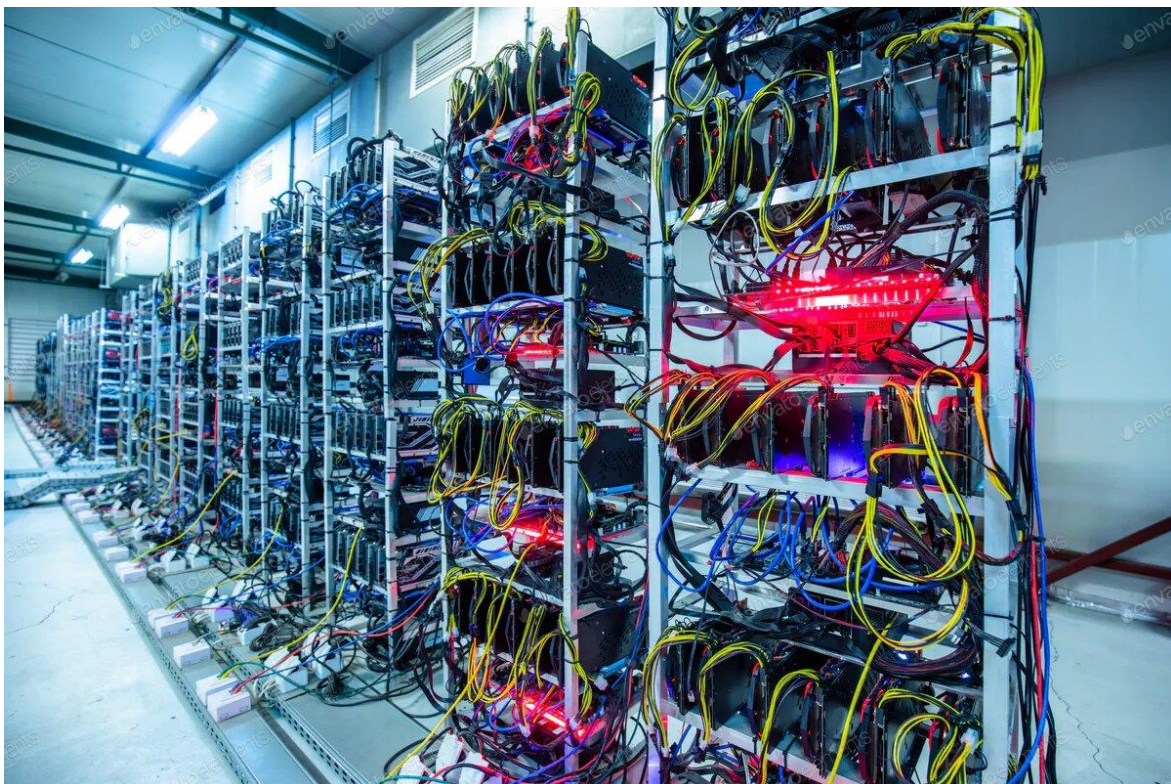

-Cryptocurrency Mining and trading

Mining is done by specialized computers. The role of miners is to secure the network and to process every Bitcoin transaction. Argoprime we achieve this by solving a computational problem which allows us to chain together blocks of transactions.

For this service, we are rewarded with newly-created Bitcoins and transaction fees.

-Hardware Delivery

Mining is popular today and offers excellent opportunities to earn extra money. Argoprime has been the reliable address for competitively priced crypto miners. Because we only supply profitable products, our customer base is constantly increasing. We strive to keep our customers happy by offering

quick delivery and at the best online prices. offering support after purchase speaks for itself.

-Investment Management

To support our goal of providing clients with strong, risk-adjusted returns and tailored solutions across our core competencies, Argoprime leverages the broader resources and our robust fundamental research and risk-management capabilities have been utilized across mining cycles and support our investment process and deal sourcing.

-Private Finance Solution

Argoprime is experienced in offering a variety of consulting service for more than 50 retirement plan platforms including 401(k), 403(b), 457, Profit Sharing, Defined Benefit and ESOPs. We service qualified plans with assets in excess of \$70 Billion. Plus, Mining has excellent working relationships with dozens of investment companies so your provider likely already knows us.

This inclusive market knowledge also helps us provide you with a global perspective that will help you create a solid mix of investment options in your plan.

Our Commitments

Argoprime appreciate the trust the investors have in us all throughout the world. Even at difficult times when other businesses are suffering due to pandemics, war, economic and social unrest, we on the other hand have been able to support our investors and our employees and even support their families as well. We are grateful to our clients in keeping trust in us and investing in us and we promise to keep the trust and pay back the profits along with the other bonuses promptly and diligently. Our success in balancing out the multiple businesses and reaping profits, and then supporting the community back even when most of the governments have failed makes us very proud. Being unaffected to the most part by the economic

and social factors, shows our strong business strategy and instils confidence in our investors. As we are dearly expanding daily and our businesses are taking over all throughout the world and expanding at an alarming rate, we would like to invite more and more clients to invest with us and make use of this opportunity to grow with us and earn financial freedom. We promise to remain committed to our investors and provide better earning structure to the early investors through our binary matching plan. We are sure that our expansion will prove to be very financially rewarding, and allow you to reap the rewards along with us.

Our Strategies

Hedge Fund Strategy and Private Equity

Argoprime Limited has invested and generated some amazing compounded annual returns by directly and

indirectly participating in the hedge funds.

Argoprime apply mostly long/short equity strategy and has found great success with it.

Long/Short equity strategy:

A wide variety of both quantitative and fundamental techniques are employed to arrive at an investment decision. We purchase the undervalued stocks and sell the overvalued stocks. We go long and short in competing companies.

Convertible arbitrage:

Convertibles generally are the hybrid securities including a combination of a bond with an equity option. A convertible arbitrage hedge fund typically includes long convertible bonds and short a proportion of the shares into which they convert. Here at Argoprime, we take long position on bonds and short positions on common stock or shares.

Capital structure arbitrage:

In this strategy we go long on the sub-ordinate bonds and short on the senior bonds, or long equity and short CDS. When we analyze that a particular company is performing badly, we utilize this strategy. In such cases, the stocks of that company will fall greatly than the bonds.

We take advantage of the fact that the stocks will become comparatively much cheaper than the bonds.

We have also some great private equity investments over the years. We also have our investment in financial technology companies that will replace traditional banking using the Internet and automation.

Governing Strategy

Our company comprises businesses into different sectors, so we have a lot to stay on top. To help with that, we have built a team to communicate and report and analyze our different businesses. The team alerts the CEO of the areas of concern and comes up with

the probable solutions, so that the governing body and the CEO can take appropriate measures and thus keep this massive conglomerate functioning smoothly. The team also keeps in constant touch with the rating agencies and keeps updated with the investor perspectives.

We strive to keep the business strategy and review process as simple as possible. Heads of each business are supposed to provide five-to-ten-year growth model and explain it to our CEO and the governing team in three or four simple metrics essentially our financial-growth model.

The model thus presented will be assessed and tested against the market dynamics and against our competitors to see if those growth aspirations make sense. We then assess the plans of each heads and funds to investments that support the overall growth model of the business is distributed based on this. Our governing body thus ensures that there is clarity of vision and strategic direction. The governing body is responsible for the financial performance of the

company by making sure the money is well distributed and invested into different sectors.

AFFILIATE PROGRAM

Argoprime offers additional opportunities in the form of referral program and binary matching income. Anybody can become a member of our program by registering to our program. To earn referral income, all you have to do is to share information about our investment offer with your friends, family, acquaintances or colleagues, as well as send them a unique referral link; after someone registers through your link, that person becomes your referral.

Referral income: As and when a member refers another member for investing under his/her own sponsor ID, the sponsor receives **10%** directly to the e-wallet upon the completion of the registration and investment.

Crypto Matching Income: It is mandatory to have active deposits to be qualified for Crypto matching bonus. Crypto matching bonus is calculated every 24 hours. Please refer to the binary matching bonus chart for further details.

In Crypto, the new clients are placed below the introducer (referrer) to the left or right side (left or right sub-tree). The tree of a binary network plan will have two legs-left and right; but if a member recruits more than two, then the additional member will be added to the next member down-line. This concept allows the additional member to be shared with down-line member (power leg) and the one who recruited them.

This is referred to as spillover. With respect to profit leg, there won't be a spillover as the profit leg will be expanded with individually sponsored downlines. The binary plan is mostly quantity oriented and not based on the levels.

WHY CHOOSE US?

We are highly experienced in offering a variety of consulting service for more than 50 retirement plan platforms including 401(k), 403(b), 457, Profit Sharing,

Defined Benefit and ESOPs. We service qualified plans with assets in excess of \$70 Billion. Plus, Mining has excellent working relationships with dozens of investment companies so your provider likely already knows us.

This inclusive market knowledge also helps us provide you with a global perspective that will help you create a solid mix of investment options in your plan. We devise solutions on behalf of cryptocurrency mining that balance the requirements of the projected parties, i.e., customers, suppliers and capital providers(investors). We have created and greatly benefit from our well- and long-established

relationships with members of the global crypto mining community in order to realize projects. We provide a multi-algorithm, multi-coin cloud mining service using the latest technology for most secured and efficient outputs.

Mining is done by specialized computers. The role of miners is to secure the network and to process every Bitcoin transaction. Here in Argoprime platform, we achieve this by solving a computational problem which allows us to chain together blocks of transactions. For this service, we are rewarded with newly-created Bitcoins and transaction fees.

Since the crypto market is a decentralized market and the movements of digital assets are volatile, it provides us with the opportunity to chance upon this criterion to mine digital blocks. The volatility means there are higher chances for profits. Our expertise on cloud mining allows us to take advantage of the volatility of the market and thus always keep us at

profit. We also invest in variety of assets through secure risk management strategy. We are also proud to be associated with hedge funds and have had financed many promising hot companies that aren't yet public. We have also some great private equity investments over the years. We also have our investment in financial technology companies that will replace traditional banking using the Internet and automation.

High Standard Security

We aim on creating risk-free investment environment for our investors. Safety of your investment will be our prime concern. Data-security and anti-theft protection features have been implemented to safeguard the information of all our investors and stakeholders. Argoprime is an authentic company with EV SSL Certificate. Our website is very secure and guarantees safety of our investors against all frauds. We have incorporated robust content management system for advanced protection and sustaining fast processes. All the data

of the company and its investors is encrypted and protected.

Guaranteed Income

Argoprime has a much-diversified business portfolio. All the portfolios of Argoprime have been highly profitable. Having diversified business structure in Digital Cloud mining has allowed us to promptly pay high returns to our investors. Our major income comes from Digital Cloud mining which is the most efficient way to mine crypto on the blockchain networks with high returns. Our experts are well-versed in anticipating and estimating the market trend and design portfolio investment accordingly to get highest profit. Our crypto mining team comes from different scientific disciplines and constantly monitor latest innovations and implement them in order to benefit our investors. We have large-scale industrial data centers with state-of-the-art technology to host the diverse and complex mining environments. At Argoprime, we're using world's best ASIC (Application specific integrated circuit)

and GPU (Graphics processing unit) machines to generate best returns with high efficiencies.
